NAS FIXES
COMPULSORY/NON-COMPULSORY RADIO FIXES

Following is a list of compulsory and non-compulsory radio fixes prepared by the National Flight Data Center. It contains the fixes in the NFDC files in effect on February 17, 1983. There are still some approach/terminal and oceanic area fixes missing from these files.

The description includes the type of navigation aid the fix is based on. Here is the key:

C — VORTAC
D — VOR/DME
M — Marine NDB
R — NDB
T — TACAN
U — UHF NDB
V — VOR

LA — LDA
LC — LOC
LD — ILS/DME
LE — LOC/DME
LO — LOM
LM — LMM
LS — ILS
ML — MLS
RD — NDB/DME
SD — SDF/DME
SF — SDF

The waypoint contraction, WP, appears between the name and state. The symbol, M, for "military" is shown also between the name and state.

The waypoints and most fixes are listed with both description and coordinates. It is planned to include the coordinates for all fixes eventually but that project is still sometime in the future.

The following additional abbreviations appear in the fix list:

AQ	American Samoa	HA	Haiti
BF	Bahama Islands	JM	Jamaica
BI	British West Indies	MX	Mexico
59	Canada	NA	Netherlands Antilles
CN	Cuba	PN	Republic of Panama
DR	Dominican Republic	TQ	Trust Territory
EQ	Canton Island	TT	Trust Territory
FI	French West Indies	WQ	Wake Island

Since the identifiers for fixes are being phased out, no attempt was made to match up the remaining ones in this list. The remaining #LL identifiers are in Section C.

As fixes are converted to name-codes, they will be published initially in the National Flight Data Digest and included in a future publication.

Please send any comments, corrections or omissions for this section to AAT-430. We shall appreciate your contributions.
